

VETSWORK – ENVIRONMENT

AMERICORPS POSITION DESCRIPTION

POSITION TITLE: Biological Science Technician / Maintenance Mechanic

PARTNER ORGANIZATION: Warm Springs Fish Hatchery - U.S. Fish & Wildlife Service

WEBSITE: fws.gov/gorgefish/warmspringsnfh/aboutwarmsprings.cfm

PROJECT LOCATION: 1 Fish Hatchery Road, Warm Springs, OR 97761

SERVICE DATES: February 7, 2022 to December 16, 2022 (1700-hour position)

POSITION SUMMARY: In partnership with the Mt. Adams Institute (MAI), the Warm Springs National Fish Hatchery will sponsor a VetsWork AmeriCorps Intern to serve as a Biological Science Technician and Maintenance Mechanic. The primary function of this facility is to collect adult salmon, spawn and rear them for release each year. The salmon are a vital resource for a tribal and recreational fishery as well as a contribution to the commercial ocean fishery. Our purpose is Tribal Trust Responsibility, to ensure that salmon return to the Warm Springs River as part of the treaty rights of the Confederated Tribes of the Warm Springs of Oregon, and for recreational and tribal fishing on the Deschutes and Columbia Rivers. Every job the Intern will perform contributes to the success of this facility and its ability to provide salmon for harvest.

The facility sits on 30+ acres of land as a lease hold from the Confederated Tribes that belongs to the citizens of the Reservation. Our staff is responsible to maintain, protect, and correctly utilize this resource to perform its primary function. The Warm Springs River runs through the property, which then runs into the Deschutes River, and then on the Columbia River near Biggs, OR. The property that borders all of this and needs to be maintained for use by the public.

Finally, the public and Tribal members also have a great interest in our job as many of them are benefiting from the salmon we produce either by direct harvest or tribal subsistence programs of surplus brood stock. The tribal and recreational angler spends a lot of time and money in pursuit of salmon during the fishing season, and Native American Tribes rely on these salmon for ceremonial and subsistence purposes. The Intern will interact with both tribal and recreational fisherman and needs to be able to communicate what we are doing and why we are doing it in a clear and understandable manner.

ESSENTIAL FUNCTIONS (TO INCLUDE, BUT NOT LIMITED TO):

- Providing standard feeds to fish according to specific schedules following established protocols.
- Observing fish to monitor their behavior and appearance for signs of stress or disease.
